**3)**

A rectangular patio has a length of  $4x$  and a width of  $3x$  metres.

The patio has a grass border with a width of 1 metre on three sides.

The total area of the patio and the grass is  $10\text{m}^2$ .

By showing that  $12x^2 + 10x - 8 = 0$ , calculate the area of the patio.

$$(4x + 2)(3x + 1) = 10$$

$$12x^2 + 4x + 6x + 2 = 10$$

$$12x^2 + 10x - 8 = 0$$

$$x = 0.5 \text{ or } x = -\frac{4}{3}.$$

$x$  cannot be negative and so

$$x = 0.5 \text{ m}$$

Area of patio

$$= 4(0.5) \times 3(0.5)$$

$$= 2 \times 1.5$$

$$= 3 \text{ m}^2$$
