Draw a frequency polygon for the information in the table.

Midpoints - 125, 135, 145, 155, 165

A frequency polygon graph is plotted on a grid. The horizontal axis (x-axis) is labeled 'Heights, h (cm)' and ranges from 120 to 180 with major grid lines every 10 units and minor grid lines every 2 units. The vertical axis (y-axis) is labeled 'Frequency' and ranges from 0 to 12 with major grid lines every 2 units and minor grid lines every 1 unit. Five data points are plotted and connected by a blue line. The points are marked with orange 'x' symbols. The points are at (125, 1), (135, 5), (145, 10), (155, 9), and (165, 3).

Heights, h (cm)	Frequency
125	1
135	5
145	10
155	9
165	3
