

Rounding to the Nearest 10, 100 & 1000

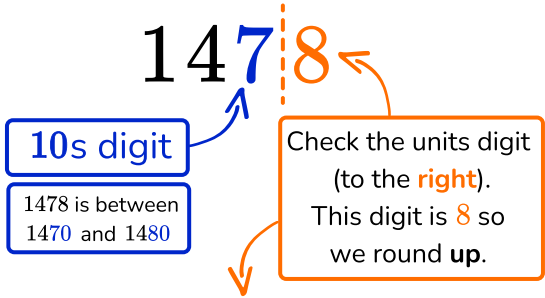

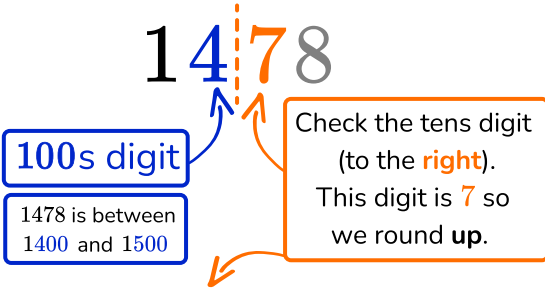

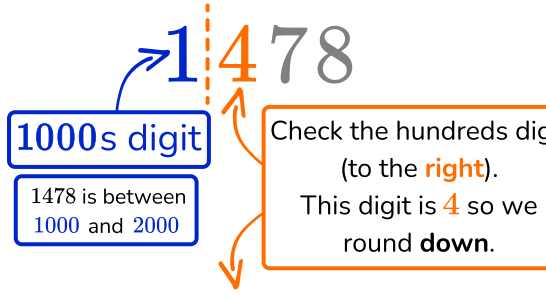

Rounding to the nearest 10, 100 or 1000 allows us to **approximate the size of a number**.

 **Example** Round 1478 to the nearest 10, 100 and 1000

Check the next digit to the **right**. If this digit is:

↑ 5 or more, round **up**.

↓ 4 or less, round **down**.

Nearest 10	Nearest 100	Nearest 1000
<p></p> <p>1478 = 1480 (nearest 10)</p>	<p></p> <p>1478 = 1500 (nearest 100)</p>	<p></p> <p>1478 = 1000 (nearest 1000)</p>
